

NEED HELP USING agencyMANAGER®?

WILLOW BROOK BROKER SUPPORT CAN HELP!

With **Willow Brook Broker Support** and **agencyMANAGER®** supporting your business you have the program plus database management to systematically:

- *Communicate* with your clients in order to resolve servicing issues.
- *Educate* clients in current issues surrounding health insurance.
- *Keep current* with your client's census data.
- *Keep agencyMANAGER® updated* to maximize its benefits.

*“Immediately after signing up for **agencyMANAGER®** I began implementing the program. A few months later I flew to my home state to care for a family member who had suddenly become ill. With **agencyMANAGER®** in place, I was able to operate my business from an alternate location without inconveniencing my clients. Through this experience, I realized how cost effective **agencyMANAGER®** is when implemented and updated properly. I designed **Willow Brook Broker Support** to offer health insurance brokers what I had wanted and found for my business, a system that provided flexibility and efficiency in operations.”*
